Marital Status Single | **Date of birth** 14-11-2001 | **Nationality** Pakistani

PROFILE SUMMARY

Motivated and detail-oriented Full Stack Web Developer with hands-on experience in building modern, responsive websites and web applications. Comfortable working with HTML, CSS, JavaScript, Python, React, Next.js, TypeScript, Tailwind CSS, and Node.js. Focused on writing clean, well-structured code and creating user-friendly interfaces that deliver a smooth user experience. Enjoy learning new technologies and working across both frontend and backend to build complete, scalable solutions. A team-oriented developer with good problem-solving skills and a strong interest in web development.

EXPERIENCE

Event Ease – AI-Based Event Planning System (oct-2025 To Jan-2026)

- I designed and developed an AI-based event management web application, **Event Ease**, as my Final Year Project. The system focuses on smart event planning with real-time collaboration.
- The project involved building core modules including AI event plan generation, budget estimation, vendor management, guest list management, and task tracking.
- My responsibilities included full-stack development using the MERN stack, designing clean and intuitive UI/UX, implementing secure authentication, and integrating an AI module for intelligent recommendations.
- The final result was a scalable, user-friendly, and fully functional platform that automated event planning processes and significantly improved efficiency, organization, and decision-making for users and vendors.

DevelopersHub Corporation © — Internship (July 2025 – August 2025)

- Collaborated with a remote development team to build modern and responsive web applications using React.js, Next.js, Tailwind CSS, and JavaScript.
- Developed user-friendly and mobile-optimized interfaces according to client requirements. Wrote clean, reusable, and efficient code while following best practices and using Git/GitHub for version control.
- Worked closely with UI/UX designers to convert wireframes and designs into functional web features.
- Debugged issues and optimized application performance to ensure smooth user experience across different devices.
- Actively participated in daily stand-up meetings, code reviews, and team discussions in an agile development environment.

AL Nafey Group (Mar-2023 To Apr-2023)

- I designed and developed a professional website for **AL Nafey Group** (www.alnafeygroup.com), a multi-service business. The project involved building two key pages: Home and Services.
- My responsibilities included layout design, UI/UX structuring, mobile responsiveness, and ensuring a clean, modern interface aligned with the brand identity. The final result was a user-friendly, visually appealing, and fully functional website that effectively enhanced the client's online presence

Farmhouse AL Nafey Group (june-2023 To july-2023)

- I developed a clean and functional website for **Swiss Haven Farmhouses** (www.swisshavenfarmhouse.com) with a strong focus on user engagement and simplicity
- The site included two main pages: Home and Booking, and featured a custom logic that enabled users to connect directly via WhatsApp, simplifying the booking and inquiry process. Built with a user-centric design approach, the website ensured smooth navigation, full responsiveness across all devices, and a seamless experience for potential customers.

Quran Art (Mar-2024)

- I designed and developed a fully responsive homepage for Quran Art, with a focus on a clean and elegant layout that reflects the beauty and significance of Islamic calligraphy and design.
- The site was optimized for seamless viewing across all devices, including mobile, tablet, and desktop. Special attention was given to typography, spacing, and aesthetic balance to create a visually engaging user experience, while ensuring strong performance and fast loading speeds.

Khaddi (June-2023)

- I developed a practice e-commerce website inspired by Khaadi: farmhousevt2e.vercel.app, focusing on showcasing sales, new arrivals, and detailed product pages.
- The site included multiple pages with real-like content such as product listings, image galleries, and description sections. A key feature was a custom search functionality, enabling users to easily find specific products or categories. The website was designed to deliver a real shopping experience, with a strong emphasis on UI/UX, responsiveness, and smooth navigation across all devices.

Travel Pakistan Tourism Website

- Developed and deployed a responsive travel/booking web application using Next.js on Vercel, optimized for fast performance, SEO, and mobile experience.
- Implemented multi-section navigation including *Tour Packages*, *Book Transport*, *Destinations*, *Blog*, *About & Contact* to enhance user journey and accessibility.
- Designed destination showcases and promotional sections for popular Pakistani tourism spots to attract and engage users.
- Integrated user-friendly contact and quick action features (e.g., WhatsApp integration) to improve lead generation and bookings.
- Ensured clean, modular component structure leveraging Next.js's routing, performance optimization, and image handling capabilities.
- Focused on front-end UX/UI quality, promoting seamless navigation and information hierarchy across the site pages.

EDUCATION

- **Bachelor of Computer Science**
Lahore Garrison University, Lahore | 2022 – 2026
- **Intermediate in Computer Science (ICS)**
Govt. College MAO, Lahore | 2020 – 2022

CERTIFICATES

- **Certificate of Completion – Full Stack Development Internship**
DevelopersHub Corporation

LANGUAGES

- Urdu
- English

HOBBIES

- Music
- Photography
